

Use only bonlex cleaner or warm water (35°C) with pure soap (such as Sunlight bar soap) and a soft cloth (e.g. microfiber) to clean bonlex. Do not use abrasive cleaners, strong household cleaners or detergents particularly those containing hydroxide ions or solvents.

As with all high quality furniture finishes care must be used in cleaning and maintenance. Some components and chemicals of strong household cleaning products and detergents are harmful to fine finishes. To avoid potential damage we advise that strong cleaning products or detergents should be avoided when cleaning.

If the foil comes into contact with any strong cleaning product or detergent, promptly rinse off with warm water ensuring that all residue from the cleaner is removed.
